**Phone:** +923107688959

A self taught Front-end developer with a knack for translating designs into pixel-perfect, responsive interfaces. Experienced in integrating APIs to deliver dynamic and interactive web solutions.

---

## Experience:

### Hiba Logics ([hibalogics.com](https://hibalogics.com))

December 2021 - April 2024

UI Front Developer

- Worked as a UI Front End Developer at Hiba Logics, a freelance web development agency specializing in providing web development solutions for various businesses.
  - Converted client-provided Figma and Photoshop designs into clean, accurate code using HTML, CSS, Bootstrap, React.js, Next.js and Tailwind CSS.
  - Designed and developed the Hiba Logics website using Figma and converted the design into code using HTML, Bootstrap, and other relevant technologies.
- 

## Projects:

### Intoobox ([intoobox.com](https://intoobox.com))

**Summary:** Developed an ecommerce platform specializing in the sale of gift boxes and packages. Translated Photoshop designs into pixel-perfect HTML with Bootstrap, ensuring full responsiveness and clean code. Implemented JavaScript functionalities for filters, custom sizing options, and color radios, alongside creating detail pages and image carousels.

- Translated Photoshop designs into pixel-perfect HTML with Bootstrap, ensuring visual fidelity and responsiveness
- Implemented JavaScript functionalities for filters, custom sizing options, and color radios to enhance user experience.
